

## Monarflex® Accessories

- Monarflex Tarp connector
- Monarflex Polytoggle
- Monarflex Clear Tape
- Monarflex Monarpunch
- Icopal Jointing Tape
- Kederflex Repair Kit HFFR
- Monarflex Zip Door Clear

### Monarflex Tarp connector

The Monarflex Tarp connector is a two piece fixing accessory for joining two overlapping sheets and is useful when high strength is required. The fixing is made by piercing through the unique Monarflex eyelets for optimal strength. If no eyelet is available in the desired position, the Tarp Connector can be fixed directly through the sheeting, but this will affect the durability of the entire sheeting. The two pieces are connected with a piercing bolt that has a thread for easy and secure fixing into the anchor plate, which is placed on the opposite side of the sheeting, sandwiching the sheeting between the bolt and the anchor plate. We recommend that you cut off the sharp end of the bolt once it is secured in place to avoid any health and safety issues.

**Pieces per bag:** 100 pieces.

### Monarflex Polytoggle

The Monarflex Polytoggle is a unique Monarflex scaffold sheeting accessory that has been designed to fit the Monarflex patented fixing eyelets. The Monarflex Polytoggle is unique in the way that its connection with the Monarflex eyelet, will provide a water resistant seal and at the same time provide the means to fix the Monarflex sheeting in place. The Polytoggle is pressed into the eyelet of the sheeting from the outside, after the eyelet hole has been trimmed of excess sheeting with a knife. A strap, rope, wires or similar is inserted into the Polytoggle and tied to the scaffold structure.

**Pull strength:** 35 N

**Pieces per bag:** 100 pieces

### Kederflex Repair Kit HFFR

In case of damage to the Kederflex sheeting a pre made "Repair kit" is available as a separate accessory. The repair kit is a patch in the size 2 x A4 with high strength self-adhesive tape for a wind and water tight solution.

### Monarflex Zip Door Clear

Clear with built-in zipper. Allows easy access to full containment sites.

### Monarflex Clear Tape

The Monarflex Clear Tape is a very durable transparent PVC tape with flame retardant properties and is UV stabilised to protect from degradation. The Monarflex Clear Tape is used for minor repairs of small holes in the Monarflex scaffold sheeting should they occur and can additionally be used to secure overlaps in order to avoid wind getting behind the sheeting.

### Performance and Properties

<b>Roll size</b>	50 mm x 20 m
<b>Thickness</b>	0.15 mm
<b>Elongation</b>	130%
<b>Application temperature</b>	+5°C to +40°C
<b>Rolls per box</b>	18 rolls

### Monarflex Monarpunch

The Monarflex Monarpunch is a small plastic hand tool used to pierce or puncture holes to allow for easier installation of the Monarflex fixing accessories, like the Monarflex Polytoggle, through the eyelet of the sheeting. When having to pierce several hundreds of eyelets in a day, this small tool will prove to be very useful and save time on site.

**Pieces per bag:** 10 pieces

### Icopal Jointing Tape

Icopal Jointing Tape is a double sided acrylic tape with a primary purpose of preventing air and leakage paths, thus improving building performance. The temperature stable, Icopal Jointing Tape can form a continuous vapour open underlay, makes waterproof seals at laps and its adhesive strength also builds up over time.

**Pieces per box:** 3 rolls
